

ETIL / ETIS

FINAL PACKAGING MACHINE

The perfect solution for precise tray lid packaging.

Innovative packaging technology for all tray packages with inside lid

FINAL PACKAGING MACHINE FOR TRAYS WITH LID

The highlights.

- Small foot print due to compact construction
- User-friendly layout
- Clearly structured and well accessible
- Combined with innovative and efficient grouping systems
- Gentle packaging of product
- Fast and simple format changeover
- Precise production of lid
- Packaging with tamper proof
- Innovative packaging technology
- Intuitive, easily understandable operation, user interface with graphic support in national language

ETIL/ETIS

FINAL PACKAGING MACHINE

ROVEMA ETIL/ETIS are compact, direct, fast and flexible. Packers for trays and L-trays, optionally with lid or with lid in U-shape.

Gentle product handling and reliable operation.

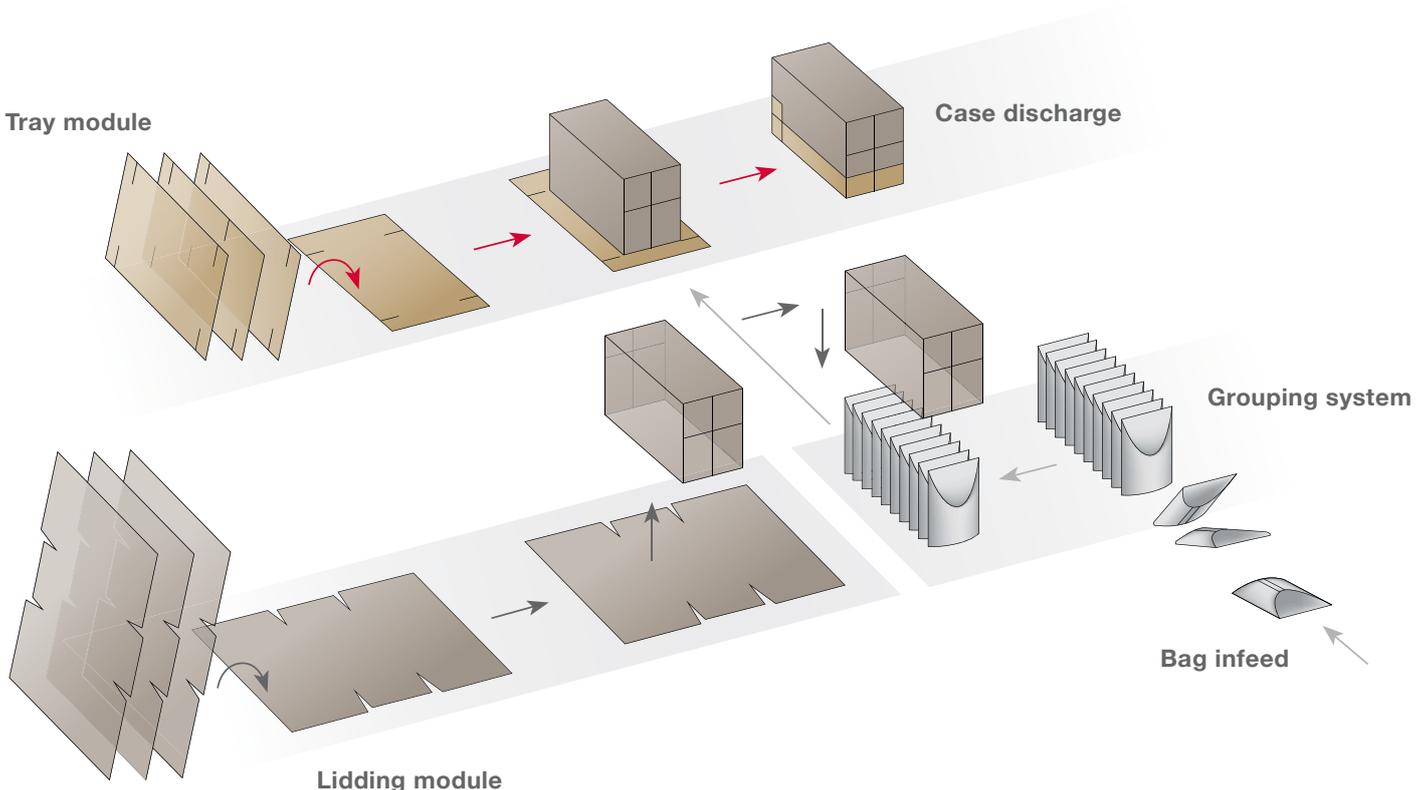

The whole packaging process is conducted with harmonious and gentle movements simply and directly at one level. This protects – despite the high output – not only the product and packaging, but also ensures functional reliability. With the hygienic design the machines are accessible and visible from all sides and thus are very easy to clean. This series is supplemented by efficient grouping systems as an ideal solution for the increasing demand of single row packing with high case output.

Effective and economic.

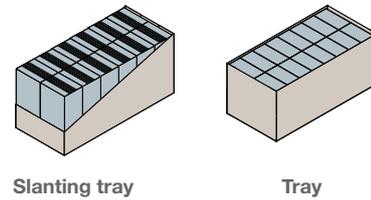

The quick format changeover is reproducible by application-specific parameters, adjustment spindles, semi-automatic format adjustment and size parts. Thus downtimes are minimized and an economic and effective production process is ensured. Integrated into the whole packaging process, the level of automation will be increased at an excellent price-performance ratio.

Safe operation with ROVEMA P@ck-Control.

ETIS/ETIL final packaging machines can easily and safely be operated with the smart ROVEMA P@ck-Control software. The intuitive touch operation with control mechanisms and dynamic limit calculation modules does not accept wrong or unreasonable data input. The user guidance with graphic support in national language does include step-by-step instructions for modifications and adjustments.

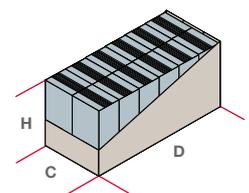

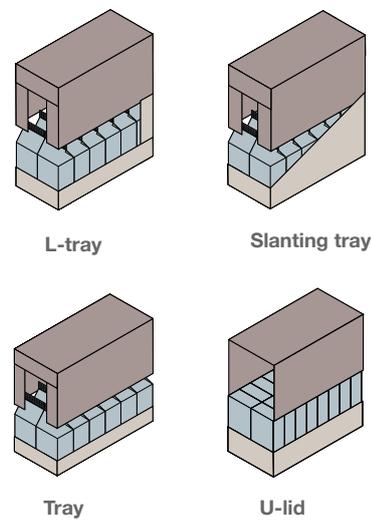

Open trays

Benefits and advantages of the ETIL/ETIS models.

- Space saving due to a compact construction and at the same time fast, robust and solid
- User-friendly low arrangement of blank magazines side by side
- Clearly structured and well accessible as the packing process is carried out at one level
- Gentle product handling by direct and smooth operation
- Ideally supplemented by innovative and efficient grouping systems
- Fast and safe format size changeover for economic production
- Precise forming of the lid through solid stamp. Thus the case is precise in shape and dimensions and enables an easy and safe palletizing and a high stack stability
- Innovative packaging technology for all tray packages with inside lid, as standard tray or L-tray.

Trays with lid

Technical data.

	ETIL 432	ETIL 443	ETIS 432	ETIS 443
Max. case size D x C x H	400 x 300 x 250 mm	400 x 400 x 300 mm	400 x 300 x 250 mm	400 x 400 x 300 mm
Max. output	25 (cases/min)	20 (cases/min)	15 (cases/min)	15 (cases/min)
	<ul style="list-style-type: none"> • Buffer indexing chain as standard grouping system • Axis functions with linear motors and servo drives 		<ul style="list-style-type: none"> • Indexing chain as standard grouping system • Conventional linear axis with servo drives
